SKATE FACILITIES

HOCKEY DESIGN AND PRODUCTION

SkateFacilities b.v. collaborates with global event coordinators to supply top-tier inline and roller hockey rinks available in the industry.

Following intelligent design, exhaustive trials, and multiple refinements, we have launched our innovative portable "SUPER SET" hockey boards as part of the "next generation" skate facilities initiative. This construction is designed for swift and straightforward assembly and disassembly, with no need for floor anchoring or additional weights, and it is compactly packaged for efficient transport. We can accommodate two portable rinks, each 50m x 25m, inside one trailer or sea container for shipping.

**PORTABLE & PERMANENT
HOCKEY RINKS
FOR ANY EVENT OR VENUE**

SKATE FACILITIES HOCKEY RINKS BEST FEATURES

1

SOLIDNESS

Robust construction essential for the high level of impact the boards have to withstand.

2

SUPER FAST BUILD

A single rink can be assembled in just 3 hours.

3

SMALL PACKAGE

1 rink of 50m x 25m can be fitted in 16 m² or a small truck or container.

4

MULTIPLE SIZES SET UP

The rink can be resized into any dimension by adding or taking out panels.

5

NO FLOOR CONNECTION

No extra weights or mounting it to the floor are needed.

SOLIDNESS

MOST IMPORTANT FEATURE

The most critical aspect of a portable hockey rink is its durable construction, achieved without the need for extra weights such as concrete blocks or water bags or securing it to the ground. Our rigorous testing, precise calculations, detailed modeling, and vast experience have made it possible. We've developed a portable hockey board that is as stable and robust as a permanent fixture, yet it does not rely on added weights or ground anchors.

FAST BUILD

TIME IS SHORT

Time efficiency is critical. With venues frequently hosting back-to-back events, there isn't the luxury of spending days on construction or deconstruction. Skatefacilities' hockey boards are engineered for rapid assembly and disassembly, achievable in less than half a day. As a result, we can set up in the morning, enabling an afternoon match to proceed without delay.

SMALL PACKAGE

TRANSPORT AND STORAGE

Transport expenses are minimized through the use of smaller vehicles and quicker loading. The hockey rink occupies merely 16-20 m² when stored and fits into a small truck, yielding significant savings on both transport and storage costs.

SET UP IN ALL SIZES

50X25M OR ANY OTHER SIZE

This hockey rink stands out for its adaptability, capable of being assembled in any location and scaled to various dimensions. Individual panels, available in 2-meter or 1-meter widths, can be removed from the enclosure without compromising stability. Configurations can range from a compact 10x10 meters to a spacious 25x50 meters.

NO EXTRA WEIGHTS

STRONG STABLE WITHOUT WEIGHTS

Additional weights, such as concrete, water, or sand, are not required for reinforcing the construction to ensure it's stable and robust for the hockey players. The integrity of the construction is secured through our innovative design, which also minimizes the time needed for assembly and disassembly.

GENERAL & TECHNICAL INFO

GENERAL INFO

BUILD AND BREAK DOWN

BUILD 3,0 HOURS.

BREAK DOWN 1,5 HOURS.

TRANSPORT

1 RINK TRUCK 8,0M

2 RINKS TRAILER 13,6M

STORAGE PACKAGE

1 RINK 20,0M².

FRAMEWORK

TUBULAR 40,0X40,0X2,0MM

GALVANIZED STEEL FRAME.

“We recently attended the World Roller Games in Barcelona and were impressed with the boards in use; we couldn't believe they were not fixed to the floor.”

“The opportunity to have such a solid structure without fixing it on the floor is one of the best characteristics of your product and the key to its success.”
